

Worksheet 2

Name: _____

Go to the course data page and download the reg_data.csv (this is the same reproductive output file we played with on Tuesday).

Using the “best” model describe what you can infer from the dataset:

What does the “best” model predict about the expected fecundity of an individual with a mass of 55 an age of 3 that is in the control group?

Describe one of the dangers of stepwise linear regression and general forward and backward model selection?
